PT-Scan

- Web based Visitor Management System
- Accurately capture visitors details by scanning in their drivers license and vehicle registration disc
- Bi-directional transaction monitoring
- Single point of installation and upgrade
- Extensive management reports
- Removes the need for a manual visitor register

supporting the trade

PT-Scan was designed and developed by the Powell Tronics in-house development team to cater for a need to accurately monitor visitors in a cost effective yet efficient means using the latest technology available.

PT-Scan improves security by enabling organizations to accurately identify who is on their premises while enhancing the professionalism of an organization by streamlining the visitor check-in process. PT-Scan enables users to capture detailed visitor information more accurately by simply scanning in the visitors drivers license and vehicle registration disc using a portable wireless license disc scanner.

With the ability to recall and update returning visitor details, PT-Scan offers organisations quantitative and qualitative information about visitors frequenting their premises. With accurate details of visitors and their intended destinations, organisations are able to use the data for research and marketing or for health and safety records in an emergency that requires knowing who is on site for evacuation processes. The comprehensive array web based reports are easy to use and contain all the information necessary for accurately manage visitors.
