ADVANCED ACCESS & SECURITY SOLUTIONS

Broadcast Vol.16

www.p-tron.com

Powell Tronics @ IFSEC JHB Gallagher

This year at SA's leading security trade show **IFSEC SA**, Powell Tronics Once again displayed the latest products available from our suppliers.

We featured a variety of new products and solutions on our stand, as well as the Latest and greatest technology in access control and biometrics available on the market.

Our super smart in-house Developed products were also on display working in a live environment. Visitors were astonished at the intelligence of the unique products/solutions that were being demonstrated. These products were created to meet various client's needs to suite today's demanding requirements.

Along with a demo of our cutting-edge visitor control driver's license scanning application that allowed visitors at our stand to enter the **"Scan to WIN"** competition, incorporating **PT-VEND** our cashless vending solution. A number of lucky visitors won prizes such as intercom systems from our Golmar range, tablet covers, tools etc...

It was all about another great opportunity for the team to add real value to the supply chain by "**supporting the trade**".

A few of the lucky prize winners from our "Scan to win" competition!!
*CONGRATULATIONS!!!*

The in-house products that were on display:

- PT-SCAN
- ATOM
- PT-VEND
- PT-GUEST
- PT-AD

SYNERION

SAFRAN
Morpho

SIGMA incorporates true value-added functionalities to deliver a terminal that goes far beyond what you would come to except from a biometric access terminal.

The terminal incorporates a colour touch-screen interface, media and messaging platform and video and audio IP intercom capabilities that allows the terminal to be used as a full featured intercom from your smartphone or computer.

It is also the first terminal to offer true 1:100 000 user matching with Morpho's world leading algorithms.

ACCESS CONTROL

Impro's new Access portal range

Access Portal Lite is ideal for managing smaller commercial and residential sites, although has a feature set that punches well above its weight.

It is a fully web based access control system, so everything you need is at your fingertips. The advanced hardware design gives you the flexibility of the ultimate in-field configuration.

This makes it one of the easiest systems to install, configure and manage.

![Golmar - Sistemas de Comunicación, S.A.]

Golmars's latest IP Poe intercom system

Golmar's latest **IP POE** intercom units **IP POE Intercom** units were displayed at the show.

The **M300** monitor is a technologically advanced monitor engine with the latest IP technology.

That makes the M300 series monitors from Golmar a reliable and advanced product.
