

Ajax LeaksProtect Flood detector

Ajax LeaksProtect detects and notifies you of an inflow of water within seconds, but automatically cancels the alarm if the area dries. Energy-efficient, reliable and extremely long lasting.

Maximum performance

- Works up to 2,000 meters from Ajax Hub in open space or across several floors of a business center
- Early detection of flooding

Protection from intruders and failure

- Waterproof with nickel-plated contacts
- Uses authentication to protect against fraud
- Tampering alarm
- Users are immediately notified of unexpected movement of the detector
- Adjustable polling period from 12 seconds

Effortless operation

- Alarms are automatically canceled if the water dries
- Two-way communication with Ajax Hub allows for periodic testing and customization
- Saves energy by regulating power consumption based on the distance from Ajax Hub
- Has a battery life of up to 5 years

Simple professional-level installation

- The quality of the connection and detection area can be tested remotely
- Connects to Ajax Hub with a single click

Tech specs

- Detector type: Wireless
- Use: Indoor
- Radio signal power: 20 mW
- Communication protocol: Jeweller (868.0-868.6 MHz)
- Maximum distance between detector and central unit: Up to 2,000 m (6,552 ft) (in open area)
- Polling interval: 12-300 sec (adjustable)
- Battery type: 2 AAA
- Power supply voltage: 3 V
- Battery life: Up to 5 years
- Working temperature range: From 0°C (+32°F) to +50°C (+122°F)
- Tampering alarm: Available
- Alarm for detector's displacement: Available
- Ingress protection: IP65
- Dimensions: 56x56x14 mm (2.20x2.20x0.55 in)
